Flatland project, create an design for the novel 'Flatland'. I made a large A0 doublesided leaflet which when viewed through either red or blue glasses would change its text in relation to specific scenes in the novel.

H.G. Wells Book Covers, I created 3 book covers for a series of books. Each cover image relates to a key moment in each book that drastically changed the protagonists lives. These events are an affair with a typist, a fight with a neighbour shopkeeper and a struggle at a door handle.

A 52 second animation made to the song 'Underneath the Flooeboards' by the band Sounds Of System Breakdown. It was a chance to experiment with After Effects for the first time, the earth is destroyed and a lone survivor is living a monotonous life underground.
